AUGUST 2011

Splish, Splash, We're having a Blast !

Dear Lellbach,

While you are out *splish splashing* around in cool places, you left Lellbach Builders in the dust working on your kitchen remodel!

Well, we are having a **BLAST!** Besides tearing apart kitchens (*a Blast for Doug & the guys*), we bring heat back into your kitchen with new materials and finishes (*My Splash*).

We are discovering "*fear of belly flop*" as our clients have to select materials for their back splash. It is without a doubt the sink or swim design element of a great kitchen remodel. It is the single selection that ties all the finishes together and creates that "AH HA" moment of perfection.

Deciding the role your back splash will play is critical to a successful outcome. Needless to say, each kitchen has it's own infinite possibilities to create the perfect finish. Playing the understated quiet dive can unite your newly remodeled kitchen in a wave of success. ([click here for photo album](#))

Thanks for the **BLAST!**

Doug & Debra

P.S. Watch for next month's "Leave Your Mark" - Backsplash part 2
