Where's the "SWEET SPOT" in your home?

February 2011

Dear Lellbach,

Where's the "sweet spot" of your home? That place where your family & friends come together to relax, spend time or just hang out.

Like many of you, our clients tell us their "sweet spots" are their family rooms, game rooms and often their outdoor living spaces. Without a doubt, the perennial favorite for most for us our home's hot spot, the kitchen!

This kitchen is "SWEET"! It has the right mix of function and style. Ample space to create a wonderful meal, while enjoying family and friends. It just doesn't get any better, wouldn't you agree?

After feeling "snowed" in for so long, it may be time to give your home's "sweet spot" new life!

Think SWEET!
